

>> Acrylic and butyl sealants

> S 100 FL

Butyl sealant

Solvent based butyl sealant. Tixotropic paste. Elastoplastic, not hardening. Excellent adhesion onto raw and painted metals. Weather and water resistant. For joints subjected to little movements.

Applications: assembling of panels and frames.

Overlap joints between metal sheets, flanged joints in air conveyors, silos, containers. For sealing spot welded metal sheets.

Packaging: Cartridge: 310 ml

Colours: Grey.

> Edilacril

Acrylic sealant

Acrylic sealant in water dispersion for professional uses and household repairing. Low shrinking, easy application and tooling. Overpaintable. Good elasticity and light resistance.

Applications: for sealing plasterboard, concrete and wood indoor walls. For sealing joints between masonry works and wood frames, rolling blind boxes. For flanged joints in air conveyors at low pressure. For filling holes and cracks in walls.

Packaging: cartridge 310 ml - Drums: 25 kg

Colours: White, grey, brown

> E.V. Flex

Butyl sealant

Solvent based butyl sealant. Tixotropic paste. Plastic, not hardening. Excellent adhesion onto raw and painted metals. Weathering and water resistant. For joints subjected to little movements.

Applications: Assembling of panels and frames. Overlap joints between metal sheets, flanged joints in air conveyors, silos, containers

Packaging: cartridge 310 ml

Colours: Grey.

> Akril 2000

Acrylic Sealant.

High performances acrylic sealant in water dispersion. Low shrinking. Good elasticity and light resistance. Overpaintable. Good adhesion onto porous materials. Easy application and tooling.

Applications: for sealing indoor prefabricated panels, perimeter joints of wood frames, plasterboards panels. Flanged joints in air conveyors at low pressure.

Packaging: cartridge 310 ml - Drums: 25-280 kg

Colours: White, grey, brown.
