

>> Adhesives for PVC pipes

> Z.Plast 107

Adhesive for high pressure PVC piping.

Transparent solvent based adhesive for bonding uPVC and CPVC piping and many other plastics such as pMMA, ABS.

High cohesion and adhesion, excellent resistance to pressure and high temperatures (-15°C ÷ +90°C), water, oils, grease and cleansing.

Applications: for high pressure PVC piping in industrial and civil purposes, for irrigation and purification plants, for hydromassage bath piping, bathtubs, hydroshower; for electrical cables piping.

Packaging: tube 125 g - Tin: 0,5/1 kg

Colours: transparent clear

> Z.Plast 160/N

Adhesive for PVC piping.

Solvent based adhesive suitable for gap-filling, with high viscosity. High adhesion and excellent resistance to water, oils, cleansing.

High strength between -15°C./+70°C.

Applications: for low pressure rigid PVC drainpiping with high allowance between pipe and joint connection.

Packaging: tube 125 gr - Tin: 0,5 kg

Colour: red

> Z.Plast 104/N

Adhesive for PVC piping.

Solvent based adhesive with good adhesion and fast setting, excellent resistance to water, oils, cleansing.

High strength between -15°C./+70°C.

Applications: for low pressure uPVC drainpiping connections, pipefittings, house-sewer, cables piping.

Packaging: tube 125 gr - Tin: 0,5/1 kg

Colours: transparent, red.

> Z.Pren 5391

Polychloroprene adhesive

Polychloroprene contact adhesive, light coloured, non staining. High resistance to heat and good adhesion to a wide range of materials: plastic laminate, wood, metals, rubber, uPVC, polyurethane foam, leather and fabrics.

Applications: for bonding laminates, wood, panels for acoustic insulation, uPVC foils, leather and fabrics in furnishing.

Packaging: Tin 1/5/16 kg

Colours: light amber
