

## >> PVA adhesives for wood

### > Z.Tex Rapido

**PVA adhesive for woodworking.**

Fast PVA based adhesive with high solids content, very strong adhesion and good performance.

Good ageing resistance.

It can be thinned to the suitable viscosity by adding water.

**Applications:** Suitable for bonding wood in hard application, paper, cardboard, cork, felt, plastic laminate and porous materials. It can be used both for cold and hot press bondings.

**Packaging:** Tin: 1 kg.- Plastic container: 5/10 kg. - Drum: 30 kg.

**Colours:** White paste.

### > Z.Tex 45

**PVA adhesive for woodworking.**

High performance PVA adhesive with low plasticizer content.

Z.TEX 45 can be thinned with high quantity of water.

When dry it forms a clear film.

Good ageing resistance.

**Applications:** Suitable for woodworking application, plastic laminate, cork, cardboard, porous material.

It can be used both for cold applications and hot press bonding.

**Packaging:** Tin: 1 kg.- Plastic container 5/10 kg.- Drum 30 kg.

**Colours:** White paste.

### > Z.Tex 115

**PVA water based adhesive for bonding wood.**

Moisture and water resistant, class D3 according to EN 204.

It can be used both for cold applications and for hot press bonding.

**Applications:** for assembling doors, windows, stairs, bathroom and outside fittings, panels.

**Packaging:** Tin: 1 kg.- Plastic container 5/10 kg.- Drum 30 kg.

### > Z.Plast C-348

**Solvent based PVA adhesive.**

Transparent, fast drying solvent based PVA adhesive.

Good ageing, temperature and moisture resistance.

High total solid content and bond strength.

**Applications:** Suitable for bonding wood, paper, leather, fabric, cork, for woodwork assembling.

**Packaging:** Bottle 200 ml - Tin: 5 kg

**Colours:** transparent.
