

>> Preformed sealants

Z Strip is a range of preformed sealants, based on butyl and polyisobutylene elastomers, extruded in strips of round or rectangular section, available in rolls or flat pieces, in a wide variety of size. Z strip do not harden, adhere to many substrates, can be easily moulded under compression for durable sealing, water and weather resistant. Different range of hardness, elastoplasticity, tackiness, compression resistance, suitable for transportation, panelling, glazing, ductwork in air conditioning, overlap joints of metal sheets, household appliances installation, plastic sheets and elastomer membranes in waterproof coverings.

Ready to use, no curing time;
High performance;
Excellent adhesion;
Movement accomodation properties;
Long durability

> Z. Strip G

Elastoplastic sealing tape

Is a elastoplastic, compressible and permanently tacky pre-formed sealing strip, ready to apply in a variety of cross-sections to customers requirements. Resistant to sunlight and non-setting the strip produces a durable waterproof and airproof seal in joints of glass, metal, wood.

Uses:

- glazing of doors and windows
- installation of curtain walls and prefabricated panels
- installation of electrical household appliances into kitchen furniture
- sealing in air conditioning systems
- in metal structural work

Colours:

Size: rectangular and round section available in rolls or flat pieces.

> Z. Strip F

Elastoplastic preformed sealing tape

Is a white elastoplastic, pre-formed sealing tape, permanetly elastoplastic, ready to apply in a variety of cross-sections. Compressible, non setting. The strip produces a durable waterproof and airproof seal in joints of glass, metal, wood and plastics.

Uses:

- glazing od doors and windows
- installation of curtain walls
- installation of prefabricated panels
- sealing of containers, campers and caravans

Colours:

Size: rectangular and round section available in rolls or flat pieces.

> Z. Strip R

Elastoplastic preformed sealing tape

Is a pre-formed sealing tape, permanently tacky, elastoplastic, ready to apply available in a variety of cross sections. Compressible non setting. The strip produces a durable waterproof and airproof seal in joints of glass, wood and plastics.

Uses:

- glazing od doors and windows
- installation of curtain walls
- installation of prefabricated panels of silos
- overlap joints between metal sheets, acrylic sheets, fibreglass.

Colours:

Size: rectangular and round section available in rolls.

> Z. Strip S3

Plastic Performed sealing tape

Is a plastic ore-formed sealant, permanently tacky, ready to apply in a variety of cross-sections to customers requirements. High adhesion, compressible non setting. The strip produces a durable weatherproof and air proof seal in joints of metal sheet.

Uses:

- for sealing overlap joints between metal sheet in covering and walls
- for flnged joints between silos metal sheet and air conveyors

Colours:

Size: rectangular and round section available in rolls or flat pieces.

> Z. Strip SG 72

Plastic sealing tape

Is a permanently plastic, tacky and water repellent sealing strip. A mouldable and flexible mass used for joints and hollows of any size and dimension.

Uses:

- for sealing household appliances
- for filling holes in bodywork and sealing panels
- for filling holes and sealing joints in metal frames
- for sealing air conditioning systems

Colours: ● ●

Size: flat pieces of different lengths.

> Z. Strip SG 72 A

Plastic sealing tape

Is a permanently plastic, tacky and water repellent sealing strip. A mouldable and flexible mass used for joints and hollows of any size and dimension.

Uses:

- for filling holes in bodywork
- for filling holes in metal frames
- for sealing holes and cracks to avoid the leakage of polyurethane foam, in sandwich panels and shop refrigerators.

Colours: ●

Size: flat pieces.

> Z. Strip SI 40

Elastoplastic sealing tape

Is a polyisobuthylene based, elastoplastic, compressible and permanently tacky pre-formed sealing strip, suitable for sealing overlap seams between metals, glass plastics and rubbers.

Uses:

- for sealing lap joints between metals, glass, plastics both in sheets and films.
- for waterproofing overlap joints in roofing
- for hermetic seal of polyamide films in vacuum-processing up to 120°C.

Colours: ● ○

Size: rectangular section available in rolls and flat pieces.

> Z. Strip SI 43

Elastoplastic self-adhesive sealing tape

Is a butyl, elastoplastic pre-formed sealing strip, non setting, waterproof and resistant to compression.

Uses:

- for sealing joint connection by spiral rolling
- self adhesive gasket resistant to compression.

Colours: ●

Size: rectangular section available in rolls and flat pieces.
